250 WORD DESCRIPTION:

Will we survive into the next age? If so, what will it look like and what will it take for us to get there? For the first time since the planet cooled 5 billion years ago, humanity is capable of influencing—for better or worse—the trajectory of evolution. This requires a tremendous responsibility and maturity of the heart.

Only through a rite of passage will humanity shift from the love of power to the power of love. No mere sentimentality, this initiation is an urgent and wrenching shift that will uproot and transform every aspect of human civilization. This paradigm saves energy, reduces disease, is ecologically sustainable, and spiritually uplifting. It focuses on networks rather than markets, favors cooperation over competition, sustainability over exploitation, co-creation of our future over procreation.

This book articulates a sustaining vision for the next era. It examines the archetypal threads of the human story and weaves its fibers into a new tapestry. Through 30,000 years of history, from our

primal infancy to the birth of civilizations, through the sibling rivalry of countless wars to our current adolescence, Judith shows how the twists and turns of the human journey have been moving inexorably toward awakening the global heart. With the advent of personal freedom and the network based information field of the Internet, through the spiritual revolution that awakens the inner world and the advances in science that pierce the outer world, we only now have the necessary tools to embrace this awakening. *Waking the Global Heart* is a catalyst for this process.
